Straw hats (草帽), once simple and practical, are now becoming popular fashion items worldwide. This (1) achievement (achieve) is due to an old skill from Shandong Province.

In Tancheng County, Linyi City, people have grown (2) and woven (编) Langya grass for over 200 years. The weaving skill is an easy thing (3) to learn (learn) and has been passed down for generations. Workers use different weaving methods, such as two-way or five-way skills, to create different patterns (4) without difficulty.

To avoid (5) losing (lose) this tradition, the Tancheng Gaoda Hats Factory set up a workshop in 2022. Led by master weaver Xu Jingxue, a great mind in weaving, (6) the workshop trains new workers and helps villages develop. A design team works to improve skills and create new products. Besides Langya grass, they now use high-quality materials to meet market needs (7) exactly (exact).

The workshop makes thousands of hat styles, producing 3 million hats yearly worth 30 million yuan. Their products (8) are ~~is~~ (sell) in over 30 countries, including the US and Japan.

To create more jobs, the factory works with local communities, setting up 30 branch factories. The factory trained over 20,000 people and provided jobs for (9) them (they). The workshop also sells hats online.

Thanks to these efforts (努力), the (10) tradition (tradition) skill of straw hat weaving continues to live in the modern world.
