Passage 6

Creative ideas are not only for great scientists but also for every ordinary student. A 15-year-old boy in our city found that city noise pollution affected people's rest greatly. He was **1.** ___so___ upset by the problem that he decided to design a noise-reducing window film. He read lots of books and did many small experiments **2.** to improve (improve) his design. How careful and persistent he **3.** ___was___ (be)! After three months of hard work, he finished his invention successfully. The film is so effective **4.** ___that___ it can reduce most outdoor noise. So far, his invention **5.** has won (win) many youth innovation awards. People always praise him for his creativity. Never ignore small social problems, **6.** ___and___ you can find your own creative direction. The boy says that anyone can be creative if he keeps **7.** ~~trin~~ trying (try). We should develop **8.** ___our___ (we) ability of observation and thinking. Every small innovation can make the world **9.** ___better___ (good). This is exactly (10.) ~~the~~ what great ideas bring to
